PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 4+ years of experience in designing, automating, and managing scalable multi-cloud infrastructure across AWS, Azure, and GCP. Strong expertise in Infrastructure as Code (Terraform, CloudFormation), Kubernetes orchestration, CI/CD pipeline automation, and DevSecOps practices. Proven track record of improving system uptime to 99.9%, reducing deployment time, and optimizing cloud costs.

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, S3, Lambda, VPC, IAM, CloudWatch), Azure (VMs, AKS, Azure DevOps, Azure Storage, Azure Monitor, Key Vault, VNet), GCP
- Containerization & Orchestration: Docker, Kubernetes (EKS, AKS)
- CI/CD Tools: Jenkins, GitHub Actions, Azure DevOps Pipelines
- Infrastructure as Code (IaC): Terraform, AWS CloudFormation, ARM Templates, Ansible
- Scripting & Automation: Python, Bash
- Monitoring & Logging: Prometheus, Grafana, CloudWatch, Azure Monitor
- Version Control & Tools: Git, Bitbucket, Azure DevOps
- Operating Systems: Linux (RHEL, Ubuntu)
- Security & DevSecOps: SonarQube, Vulnerability Scanning, IAM, RBAC

PROFESSIONAL EXPERIENCE

DevOps Engineer | Tata Consultancy Services (TCS)

Feb 2022 – Present

- Managed and optimized AWS cloud infrastructure ensuring high availability, scalability, and security compliance.
- Designed and implemented Infrastructure as Code (IaC) using Terraform and AWS CloudFormation, reducing manual provisioning by 80%.
- Automated configuration management using Ansible for consistent environment setup.
- Orchestrated containerized applications using Kubernetes (Amazon EKS), improving application scalability and reliability.
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 50%.
- Integrated DevSecOps practices including SonarQube code quality checks and vulnerability scanning into CI/CD pipelines.
- Implemented monitoring and alerting using Prometheus, Grafana, AWS CloudWatch, and Azure Monitor.

- Improved system uptime from 97% to 99.9% through proactive monitoring, auto-scaling, and performance tuning.
- Reduced AWS and Azure infrastructure costs through resource optimization and rightsizing strategies.
- Developed automation scripts using Python and Bash to streamline operational workflows.
- Automated AMI creation using Packer, Jenkins, and Ansible for standardized deployments.
- Managed Azure cloud resources including Virtual Machines, Storage Accounts, Virtual Networks, Load Balancers, and Key Vault.
- Implemented Infrastructure as Code using Terraform and ARM Templates for Azure resource provisioning.
- Built and maintained CI/CD pipelines using Azure DevOps for automated application deployments.
- Deployed and managed workloads on Azure Kubernetes Service (AKS).
- Configured Azure Monitor, Log Analytics, and Application Insights for centralized monitoring and alerting.
- Implemented RBAC and Azure IAM policies to strengthen security and governance.
- Supported hybrid cloud environments integrating AWS and Azure services.
- Administered and hardened Linux servers for production workloads.
- Collaborated with Development and QA teams to standardize CI/CD workflows and release processes.
- Participated in incident management, RCA, and 24/7 on-call support.
- Demonstrated strong understanding of networking concepts including TCP/IP, DNS, load balancing, and HTTP/HTTPS.

EDUCATION

Master's Degree in Computer Engineering
 Sri Krishnadevaraya University, Anantapur, India
 Graduated: 2020

CERTIFICATIONS

- AWS Certified Developer – Associate (2025)
